

# IPHONE APN SETTINGS

# Windows APN Settings

- Go to ---> Settings  
Then go down to ---> Access Point (near the bottom)  
Click on the + sign "to add" then follow these next directions:
  1. Connection name: GVC
  2. Internet APN  
  
Access Point Name: globaldata  
Username: (leave blank)  
Password: (leave blank)
  3. Click on the Check Mark for "Done"
  4. You might have to go back one page to "Access Point" and click on Straight Talk until it becomes active and the other one inactive.
  5. Reboot.
  6. Test out your internet.
